

# Kélian Dascher-Cousineau

214 Segre Place, Santa Cruz, Ca, 95060 – (831) 226 9620 – [kdascher@ucsc.edu](mailto:kdascher@ucsc.edu)

## Education

---

2017-	Ph.D. in Earth and Planetary Sciences	UC Santa Cruz
2015-2017	Master in Earth and Planetary Sciences	McGill University
2012-2015	Honors in Planetary Science	McGill University

## Research Experience

---

2017 -	PhD thesis: Earthquake Physics	UC Santa Cruz
Reporting to Professor Emily Brodsky, Thorne Lay, and Noah Finnegan: studies on the global variations in aftershock productivity, the remote detection of earthquake fault damage, and the geomorphology of fault zones.		
2015 - 2017	Master's thesis: Rock Mechanics	McGill University
Reporting to Professor James Kirkpatrick: a study of the maturation and wear processes of fault slip surfaces as they evolve with displacement		
2014 - 2015	Honor's research project: Fault Architecture	McGill University
Reporting to Professor Christie Rowe: a detailed survey and description of the Champlain Thrust fault core architecture in the context of fault zone permeability.		
Summer 2014	Intern at GEO4 GmbH: Geophysics and Hydrogeology	Munich, Germany
A geotechnical and geophysical analysis related to environmental regulation, surveying, and engineering.		
Summer 2013	Research project: Seismology	McGill University
Reporting to Professor Yajing Liu: a geospatial analysis of the West Quebec Seismic Zone.		

## Awards and Scholarships

---

2019	NASA FINESST	135 000\$
2019	Casey Moore Fund	3 500 \$
2019	NSERC Postgraduate Scholarship - Doctoral	42 000 \$
2018	Jack Henderson Award (Best MSc Thesis of 2017)	270 \$
2016	GSA Research Grant	1 800 \$
2016	William Henry Howard Scholarship	2 000 \$

## Publications

---

- 2020 Dascher-Cousineau, K., Lay, T., & Brodsky, E. E. (2020). Two Foreshock Sequences Post Gulia and Wiemer (2019). *Seismological Research Letters*.
- 2020 Dascher-Cousineau, K., Brodsky, E. E., Lay, T., & Goebel, T. H. (2020). What controls variations in aftershock productivity?. *Journal of Geophysical Research: Solid Earth*, 125(2), e2019JB018111.
- 2019 Liu, C., Lay, T., Brodsky, E. E., Dascher-Cousineau, K., & Xiong, X. ( 2019). Co-seismic rupture process of the large 2019 Ridgecrest earthquakes from joint inversion of geodetic and seismological observations. *Geophysical Research Letters*, 46.
- 2018 Dascher-Cousineau, K., Kirkpatrick, J. D., & Cooke, M. L. (2018). Smoothing of Fault Slip Surfaces by Scale-Invariant Wear. *Journal of Geophysical Research: Solid Earth*, 123(9), 7913-7930.
- 2018 Rowe, C. D., Ross, C., ... Dascher-Cousineau, K. et al., (2018). Geometric complexity of earthquake rupture surfaces preserved in pseudotachylite networks. *Journal of Geophysical Research: Solid Earth*, 123(9), 7998-8015.
- 2016 Mundy, E. M., Dascher-Cousineau, K., Gleeson, T., Rowe, C. D., & Allen, D. M. (2016). Complexity of hydrogeologic regime around an ancient low-angle thrust fault revealed by multidisciplinary field study. *Geofluids*, 16(4), 673-687.

## Presentations

---

- 2019 Dascher-Cousineau, K, Brodsky, E. E., Finnegan, N., Duvall, A. (2019). Large scale detection of fault damage. American Geophysical Union (AGU) Fall Meeting Abstracts (*talk*). Southern California Earthquake Center (SCEC) meeting (*poster*)
- 2018 Dascher-Cousineau, K., Brodsky, E. E., & Lay, T. (2018). Why do strike-slip earthquakes produce fewer aftershocks? American Geophysical Union (AGU) Fall Meeting Abstracts (*talk*). Southern California Earthquake Center (SCEC) meeting (*poster*)
- 2016-2017 Dascher-Cousineau, K., Kirkpatrick, J. D., & Cooke, M. L.. Evolution of fault slip surfaces with displacement. GAC-MAC (*talk*) Gordon Research Conference: Rock Deformation (*poster*), Canadian Tectonics Group (*poster*), McGill Earth and Planetary Science (EPS) Symposium (*poster*).

## Teaching Experience

---

2016-	Undergraduate research mentor: Mitchell May studying fault roughness, Alex Watson studying automated crack detection using machine learning
2015-	GIS, hydrogeology, structural geology, mineralogy, and field school teaching assistant
2012-2015	Math, physics and geology tutor

## Practical Skills

---

<i>Programming</i>	MatLab, Python, GIS, basic HTML, Java, C, and C++
<i>Fieldwork</i>	Seismic surveying; boring for water and soil sampling; total station, GPS and LiDar surveying; geological mapping; wilderness first aid (CPR/AED(A+))
<i>Instrumentation</i>	White light profilometry, XRD, SEM, AFM, and optical microscopy
<i>Foundations</i>	ODE's, PDE's, vector calculus, advanced linear algebra, numerical analysis, statistics, regression, complex analysis signal processing, dynamic systems, mechanics, and machine learning
